Cupping Informed Consent

Massage Cupping is a treatment of creating a vacuum suction in a cup, which is applied to the surface of the skin. The purpose of this technique is to promote health and healing by: loosening soft tissue and connective tissue, scarring and adhesions moving stagnation and increasing lymphatic flow and circulation. The cups are moved over the skin using gliding, shaking, popping, and rotating techniques while gently pulling up on the cup, or may be parked or placed for a short time to facilitate joint mobilization or soft tissue release. Another benefit is to pull toxins and inflammation from the body to the surface of the skin where the lymphatic system can more readily eliminate them.

Potential reactions to Massage Cupping are temporary and may include:

- Cupping marks: discoloration due to metabolic waste, toxins and other stagnant material that have been freed from the underlying tissue.
- Post treatment tenderness: Usually less than experienced from deep tissue work.
- Redness and itching: increased vaso-dilation and/or inflammation brought to the surface
- Very rarely a slight burn or blister may appear due to the heat and or suction.

Suggested after care recommendations:

- Drink plenty of water to help eliminate toxins out of the body.
- Avoid showers, steam, sauna and exercise for 3-4 hours.
- Light stretching and range of motion exercises are beneficial.
- Exercise the next day will help increase circulation to aid in fading of cup kisses.

Contraindications:

People who are on blood thinners should alert Infinity Wellness Center. People with skin ulcers, high fever, spontaneous bleeding, thin muscles, edema, convulsions, abdominal or sacral regions of pregnant women, severe allergic skin, dermatitis should not receive this treatment. You cannot be under the influence of drugs or alcohol.

Infinity Wellness Center has provided me with information on the Cupping bodywork technique. If I choose to experience this therapy in my treatment, I understand the effects and after-care recommendations. It has been explained to me that there is a possibility of a temporary skin discoloration or “cup kiss”, appearing as tissue is released. I am aware that a “cup kiss” is a form of a bruise and that it will dissipate within a few hours to 14 days.

I understand that all treatments by the practitioner at this facility are therapeutic in nature. I agree to notify the practitioner of any physical discomfort experienced during the session. I have stated all relevant physical conditions and will inform the practitioner of any changes in my health.

TERMS OF ACCEPTANCE

When accepting a new client who is seeking acupuncture, A.M.I.T., Class IV laser, chiropractic, cupping, decompression, dry needling, Graston, Nasal Specific technique and/or pulse, it is essential for both the client and the doctor to be working towards the same objective. Chiropractic has only one goal to work toward the cause, not the effect. It is only when the client understands both the objective and the method that they will be able to attain it. This will prevent any confusion or disappointment.

An adjustment is the specific application of forces to facilitate the body's correction of vertebral subluxation. Our chiropractic method of correction is by specific adjustments to the spine. Health is a state of optimal physical, mental, and social well-being, not merely the absence of disease. Vertebral Subluxation is a misalignment of one or more of the joints in the body. This can cause pain or alteration of nerve function and interference of the transmission or nerve impulses, lessening the body's innate ability to maintain maximal health.

We do not offer to diagnose or treat any disease or condition other than vertebral subluxation. However, if during the course of a chiropractic spinal evaluation, we encounter non-chiropractic or unusual findings, we will advise you. If you desire advice, diagnosis or treatment for those findings, we will recommend that you seek the services of a health care provider who specializes in that area. Regardless of what the disease is called, we do not offer to treat it. Nor do we offer advice regarding treatment prescribed by others. Our only practice objective is to eliminate a major interference to the expression of the body's innate wisdom. Our only method is specific adjusting to correct vertebral subluxation.

I have read and fully understand the above statement. Any questions regarding the Doctor's objectives pertaining to my care in this office have been answered to my complete satisfaction. I therefore accept chiropractic care on this basis.
